

Shubham Sad

9977047557

Full Stack Developer(P/MERN Stack)

shubhamsaad777@gmail.com

Over the last 3.9 years as a developer, I've built a strong capability to work across the entire software development lifecycle – from designing and developing server-side APIs, to crafting dynamic, responsive UIs, debugging, and delivering end-to-end features with the P/MERN stack (Postgres, MongoDB, Express, React, Node).

Full Stack Developer

Uniqueconcept Pvt Ltd - Riyadh,UAE

November 2024 - Present

Designed and implemented end-to-end payment integration workflows using PayFort, HyperPay, covering order creation, payment processing, and delivery coordination.

Developed and maintained scalable RESTful APIs using Node.js and Express for mobile and web platforms, enabling seamless communication between frontend and backend systems.

Debugged and resolved critical backend issues, improving API performance and reliability across the system, especially in complex payment and order processing scenarios. Collaborated with mobile app teams to integrate backend APIs into Flutter-based applications, ensuring smooth user experiences for payment and order tracking features.

Led the backend architecture for payment modules, including security handling, status tracking, and webhook processing, ensuring compliance and real-time transaction updates.

Designed and developed a comprehensive admin portal to manage website operations, including user management, order tracking, payment status, and time slot scheduling. Implemented automated report generation features for sales, customer insights, and time slot analytics, improving business decision-making with real-time data visualization and exports.

Full Stack Developer

Betr Tech Pvt Ltd

June2023-October2024

Collaborated with cross-functional teams to ensure seamless integration of front-end and back-end components, delivering fully functional web applications. Used Javascript, MONGODB and React to develop app-solutions.

Ensured data security by implementing robust authentication and authorization mechanisms on both client-side and server-side applications. Liaised with rebranding experts to optimize websites for increased conversion rates.

Utilized React to create intuitive and visually appealing user interfaces, resulting in enhanced user experience and increased user retention rates.

Education

August 2012 - June 2016

Indore Institute of Science and Technology Indore
Bachelor of Engineering - Computer Science

Software Developer

Waveaxis technologies Pvt Ltd

June 2022 - June 2023

Led the development of key features and improvements, resulting in a more user-friendly and feature-rich product, leading to increased user engagement and satisfaction

Successfully built backend APIs in .NET during initial days of development without prior experience, leveraging AI tools (ChatGPT) for guidance and problem-solving, while primarily contributing as a React developer.

Boosted page loading speed from 825 ms to 520 ms by implementing effective memoization techniques and incorporating lazy loading in React.

On server side implemented caching and pagination techniques in Node.js to optimize API performance, reducing response times Utilized node-cache for efficient in-memory caching and structured pagination logic to manage large datasets

Full Stack Web Developer

SocialTek - Hyderabad

August 2020 - May 2022

Developed and maintained software applications for mobile and web
Proficient in developing AI chatbot-based applications
with hands-on experience
Hands-on experience in startup environments,
approaching tasks with enthusiasm akin to a co-founder
Possessing a mindset aligned with that of a product manager, effectively contributing to product development and strategy.
